Quiz

Question 1

1/1 point (graded)

Which OpenCV function is used for drawing the pose estimation results on an image?

☐ cv2.rectangle()

☐ cv2.putText()

☒ cv2.line() ✓

☐ cv2.drawContours()

Submit

You have used 1 of 2 attempts

✓ Correct (1/1 point)

Question 2

1/1 point (graded)

Why is it important to convert an image to a blob before feeding it to a pose estimation model?

☐ It reduces the size of the image and makes it faster to process

☒ It standardizes the image format and ensures compatibility with the model ✓

☐ It makes the image easier to visualize and interpret

- ☐ It allows the model to adjust its parameters based on the specific image being processed.

Submit

You have used 1 of 2 attempts

✓ Correct (1/1 point)

Question 3

0/1 point (graded)

The applications of Caffe Model for pose estimation is/are:

☐ Human action recognition and behavior analysis

☒ Facial recognition and emotion detection ✗

☐ Autonomous driving and robotics

☐ All of the above ✓

Submit

You have used 2 of 2 attempts

❗ Answers are displayed within the problem

Question 4

1/1 point (graded)

Which of the following is a challenge in using the Caffe Model for pose estimation?

☐ The model is not able to detect poses in videos

☐ The model is not able to detect poses in real-time

☒ The model is sensitive to variations in lighting and background. ✓

☐ The model is not accurate for images containing multiple people.

Submit

You have used 2 of 2 attempts

✓ Correct (1/1 point)
